

# Connexus<sup>®</sup> Extranet

IPC

Financial extranet service for capital markets connectivity

Solution sheet

## Benefits of IPC's Connexus Extranet to Capital Market Participants

- Streamlined communications and reduced complexity through fully managed connectivity
- Low total cost of ownership
- Fast activation, flexibility and access to multiple service providers through a single network connection
- Global coverage
- Diverse, resilient and ubiquitously available
- Automatic failover through redundant connectivity to end-points
- Highly secure, scalable and reliable network
- Supports several access options – 64kbps to 1GB – with bandwidth being managed as demand grows
- “Follow-the-sun” 24x7x365 world-class customer service and meeting stringent SLAs

## Creating a Globally Connected Financial Community

IPC is a leading provider of voice and electronic trading communications for the financial services industry. IPC's Connexus Cloud ecosystem interconnects global financial centers and more than 6,600 financial market participants across 750 cities in over 60 countries with connectivity in support of all aspects of the trade lifecycle. IPC's established community of market participants includes liquidity venues, buy-side firms, sell-side firms, inter-dealer brokers, market data providers, independent software vendors and clearing / settlement firms.

Performance engineered for electronic trading, the IPC Connexus Extranet is a paradigm that has transformed the manner in which capital market participants,

application vendors, liquidity venues and content providers conduct business with one another. Through a single connection, members of the IPC Connexus Extranet ecosystem can link to one another and seamlessly communicate, transact, receive and distribute information. Buy-side firms, sell-side firms and inter-dealer brokers can quickly and cost-efficiently access a broad range of trade lifecycle services such as order routing, order management, execution, management, trade execution, market data and clearing services. Built on an IP/MPLS backbone the highly scalable, reliable and secure Connexus Extranet supports a number of industry standard protocols. The network is engineered to be fully resilient to provide clients with a 100% uptime SLA.

## Connectivity Throughout the Full Trade Lifecycle

# Connexus<sup>®</sup> Extranet
