

Connexus Unigy

IPC

Managed and Dedicated Unigy Solution Leveraging IPC's Connexus Cloud

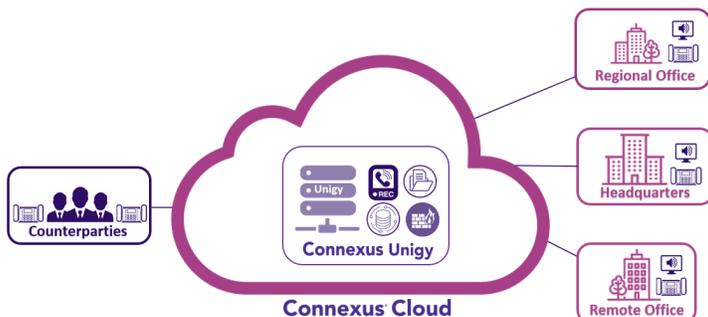

Risk & Compliance

Connexus Unigy is a state-of-the-art (SOA) based platform for trading communications and applications offering ground-breaking, unified, integrated platform for both trading communications and compliance.

In the ever evolving and increased complexity of regulatory requirements, you can rest easy knowing that Connexus Unigy communications are inherently secure and compliant, addressing both regulatory and internal compliance burdens.

Connexus Unigy Benefits

- Dedicated managed Unigy solution available across IPC's extensive global presence
- Connexus WAN delivered Front Rooms offers ability to extend your dedicated private infrastructure
- Flexible architecture options support full cloud implementation, hybrid solution or BCP only designs
- Resilient high availability solution lowers operational costs and improves operational efficiencies
- Ability to dynamically scale your infrastructure as needed
- IPC product solution offers a single MSA / SLA from one supplier resulting in simplified management and support
- Reduction in capital investments and operational expenses with predictable monthly spend
- Maintenance and updates completed by IPC financial industry experts

Cloud Generation Communications Platform

As the financial community embraces the adoption of cloud solutions, IPC leads the way with Connexus Unigy which combines

our award winning Connexus Cloud infrastructure and Unigy communications solution by leveraging globally located data centers across IPC's global network and community to offer a flexible, customizable and adaptive communications solution designed for your organizations specific requirements.

Customized to Business Requirements

Connexus Unigy offers various implementation options ranging from full cloud integration, a hybrid solution enabling the

expansion of your existing on-premise enterprise into the Connexus Cloud or a cloud BCP solution. Additionally Connexus Unigy includes an array of customization options ranging from:

- Cloud or On-Premise Voice Recording
- Dial-Tone Integration
- TV Audio Incorporation
- Dedicated BlueWave or BlueWave Cloud Services
- Fully Managed or Partially Managed Solution

Operational Efficiencies

Connexus Unigy reduces the risks of disruption by offering maximum uptime with its

fully resilient design at both the network and communications level combined with BCP capabilities for disaster recovery. IPC's highly skilled technicians perform all system monitoring, maintenance and support, ensuring your solution is operating at peak efficiency. With Connexus Unigy you receive a solution that offers a predictable cost model with resources focused on delivering and supporting infrastructure and communications capabilities that are optimized for exceptional service performance.

Global Availability

Connexus Unigy is vendor agnostic enabling IPC to utilize | best-of-bread data center providers within various regions with Data Centers readily available in the below markets, however IPC is also able to support additional locations not listed below on a case by case basis:

World Class Support

Financial firms need a partner they can trust and one who provides industry leading support. IPC's Connexus Unigy is monitored, managed and supported by a team of highly skilled engineers around the world providing 24x7x365 world-class customer service. IPC's

Global Service Operations Centers (GSOCs) in New York, London and Singapore are exclusively focused on servicing the capital markets by monitoring the infrastructure at all hours of the day and night. The GSOC operates using a follow-the-sun support model, including a detailed handoff process from one Center to another, ensuring proactive monitoring and management of the network continues. IPC Network Services customers are provided access to the IPC Portal, which offers operational intelligence, enables them to check on the status of circuits, request additional products or services and view circuit performance.

About IPC

IPC is a technology and service leader that powers financial markets globally. We help clients anticipate change and solve problems, setting the standard with industry expertise, exceptional service and comprehensive technology. With customers first and always, we collaborate with each to understand their individual needs to help make them secure, productive and compliant within our connected community. Through service excellence, long-developed expertise and a focus on innovation and community, we provide agile and efficient ways for our customers to accelerate their ability to adapt to the ever-changing requirements for advanced data networks, compliance and collaboration with all counter-parties across the financial markets.
