

Connexus® SD-WAN

IPC

Expanding Connexus Cloud Capabilities and Local Access

Solution sheet

Expanding Connexus Cloud Capabilities

Connexus SD-WAN is an access option into the Connexus Cloud for customers who have requirements at geographically difficult locations for standard connectivity or who are otherwise looking for alternatives to traditional network access.

The value of Connexus SD-WAN increases exponentially when combined with the power of IPC's financial markets ecosystem. Connexus SD-WAN enables a firm or user to cost effectively access an ecosystem of over 6,600 sites and 200,000 end-users.

Growing Local Access

By leveraging customer-provided high-speed internet connections, Connexus SD-WAN enables direct access to the Connexus ecosystem for remote sites and home-based end users. Quickly, reliably and securely.

Remote working users can be securely a part of the enterprise or community, ensuring private data remains private at all times, with or without a VPN.

With Connexus SD-WAN in the solution portfolio, more locations can connect to IPC's private and secure cloud than ever before.

Connexus SD-WAN – Access to IPC's Vast Financial Ecosystem

Historically, access to Connexus Cloud was limited by proximity to an IPC Point of Presence or the risks that long-haul circuits entail.

Connexus SD-WAN now brings the global reach of Connexus Cloud to remote sites and end users worldwide. With Connexus SD-WAN, you can:

- **Expand Reach** – Secure connectivity to Connexus Cloud from any global location
- **Strengthen Security** – Next Generation Firewall (NGFW) technology securely connects home-based users and their multiple devices with more insight and greater QoS control
- **Boost Relationships** – Access to trading counterparties across the world
- **Mesh Technologies** – Connect sites using the internet and private connectivity with Connexus SD-WAN's Hybrid MPLS/Internet design
- **Refresh Technology** – Enhance or replace legacy devices with cutting-edge technology

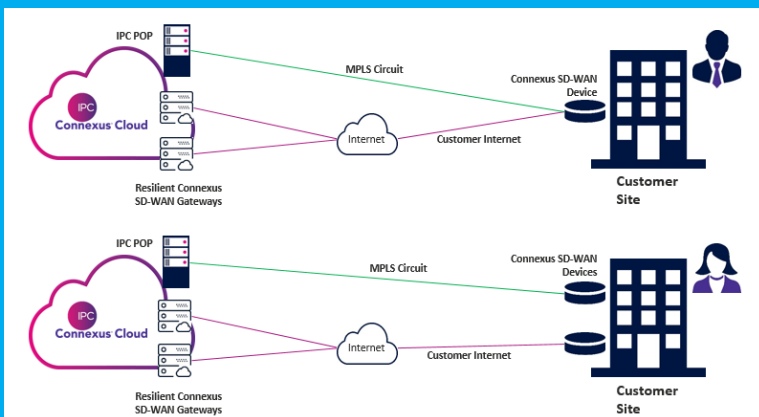

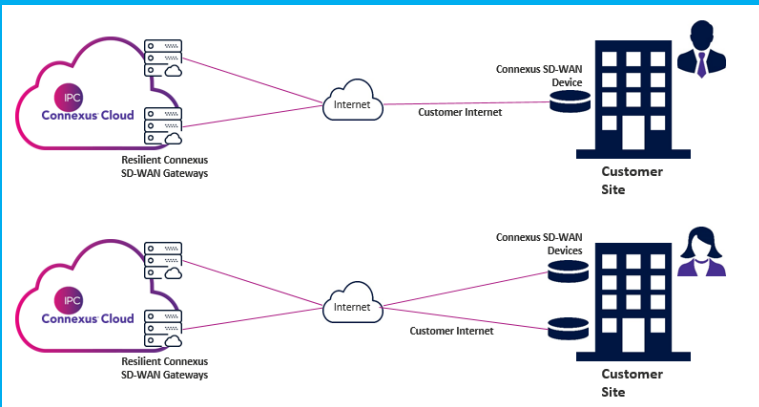

Connexus SD-WAN facilitates access to Connexus WAN and Connexus Extranet services. Connexus SD-WAN is built on Fortinet's proven technology and IPC's award-winning cloud services.

Connexus SD-WAN Benefits:

- **Connect distant branches** to large offices with simpler and more cost-effective access options
- Utilize IPC's Hybrid MPLS/Internet model to **manage traffic**, dividing critical data to ensure optimal performance
- Deliver **secure services to home-based end users**, safeguarding the security of sensitive data
- Provides multiple access options for **disaster recovery solutions**

SD-WAN isn't a "one size fits all" problem, so why use a "one size fits all" solution? With Connexus SD-WAN, bring the power of the Connexus Cloud to new heights.

Connectivity and Architecture Options

About IPC

IPC is a technology and service leader that powers financial markets globally. We help clients anticipate change and solve problems, setting the standard with industry expertise, exceptional service and comprehensive technology. With customers first and always, we collaborate with each to understand their individual needs to help make them secure, productive and compliant within our connected community. Through service excellence, long-developed expertise and a focus on innovation and community, we provide agile and efficient ways for our customers to accelerate their ability to adapt to the ever-changing requirements for advanced data networks, compliance and collaboration with all counter-parties across the financial markets.
