

IPC Remote Devices

IPC

Despite the old adage, when it comes to best-in-class trader voice, you can indeed take it with you!

Solution sheet

Continuity during Uncertainty:

IPC's Remote Devices leverage the flexibility of our best of breed Unigy platform to enable traders and trade support staff to maintain business continuity when they are unable to access their primary location.

During emergencies, customers can remain confident that their traders and trade support staff can continue to work with minimal negative impact. Users will benefit by having a familiar device negating any need to learn how to communicate via another means.

With full Voice Recording capabilities, firms can now ensure their remote users remain compliant without sacrificing any features or functionality.

Remote Devices can be deployed before or during an emergency situation, allowing customers to be ready for any unforeseen situation by enacting their BCP scenarios on-demand.

Business as "Usual", Regardless of Location!

IPC's Remote Device capabilities allow customers to relocate traders and trade support staff to an alternative location while keeping all their counterparty details intact. IPC will replicate their specific turret / device configuration from any location that is external to the corporate enterprise.

Utilizing standard turrets and devices, users can access all of their Unigy resources via a customer-provided, secure VPN connection. No need to notify partners or counterparties of new numbers or reprogram any buttons.

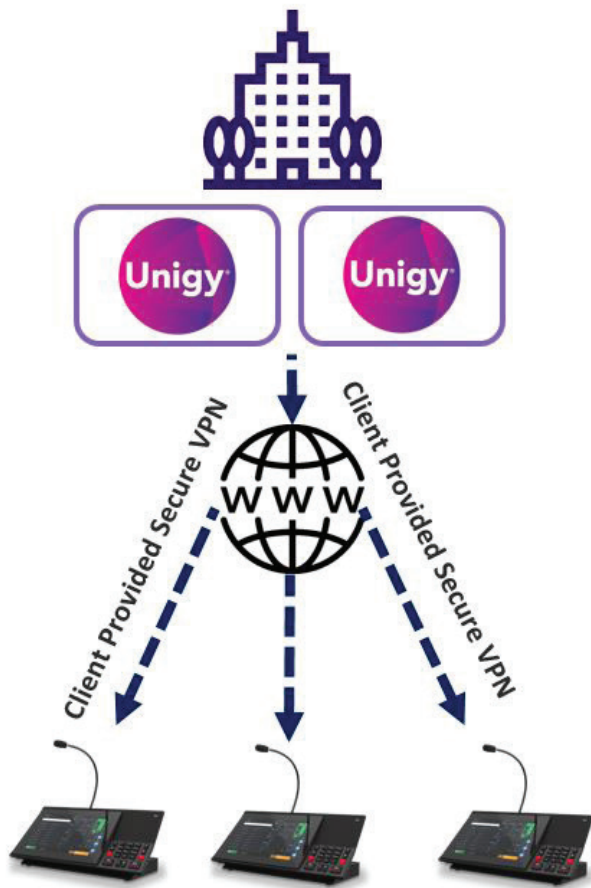

IPC provides detailed guidelines for customer network requirements and configuration. This allows customers to ensure their environment is ready to support remote device connectivity when they need it.

Features:

- Full featured and customized turret/device from any location with secure access to the corporate network
- Low risk BCP solution always ready to go
- Access to all private wires, speaker channels, dial tone and intercom lines
- Access to Directory and Call History Applications
- Supports all IQ/Max, IQ/Max Touch, IQ/Max Edge and Pulse Devices
- Remain compliant regardless of location
- Full voice recording capabilities while remote
