

# Connexus<sup>®</sup> COLOCATION

## Colocation focused on the Financial Community

**Connexus Colocation** – provides access to the most important exchange locations within the financial community. Our flexible offer is specially designed to allow access to all capital market participants and will position you to take advantage of IPC's ready-made ecosystem, interlocking with financial centers across over 700 cities.

### Core Attributes

- A combination of redundant infrastructure power options coupled with resilient network connectivity allows IPC to offer stringent Service Level Agreements (SLA). This allows IPC to provide industry leading availability and uptime designed specifically for the financial markets.
- Connexus Colocation allows access to connectivity options including Connexus Extranet, Connexus WAN, Connexus Ethernet or managed cross-connects to expand their reach.
- IPC offers customizable solutions enabling scalability, no matter how large or complex your environment is now or in the future.
- IPC provides access to highly secure data centers that ensure the safeguarding of mission-critical data, enabling operational reliability with an industry-leading uptime
- Whatever the configuration required, you will be ensured access to our secure environment while maintaining full command and control of your network infrastructure.
- Via the Equinix Management Portal, Connexus Colocation offers a fully managed option which includes 24x7x365 monitoring and management and extends Managed Smart Hands for an assortment of services ranging from installation, physical MACs (Moves, Adds, Changes) and troubleshooting.

## What Connexus Colocation has to offer

As more and more companies begin to optimize their IT infrastructure, many have now opted to trust others with the management of their data and servers through colocation services.

Colocation allows for greater time and resources invested into pursuing critical tasks within the business, while removing the cost and minimizing the risk of storing your server on site.

## Why use IPC Colocation?

IPC understands the makeup and requirements of the global capital markets. Connexus Colocation partners you with financial industry pioneers uniquely positioned to architect, deploy, manage and maintain your environment:

- Security
- Management
- Connectivity
- Flexibility
- Customizable
- Reliability
- Security
- Management

## Infrastructure

IPC offers the opportunity to combine our Colocation with the strengths of our Connexus Cloud, allowing for integrated connectivity to additional IPC services including Exchange Access and Market Data Services, Global WAN and Extranet connectivity and Public Cloud through a single managed infrastructure.

## IPC Colocation

Connexus Colocation provides value as it enhances the reliability of your network performance, allowing for greater efficiency in trading activities, while ensuring compliance with data regulations.

Connexus Colocation enhances the viability of your network infrastructure and reduces the potential of risks through the following:

- Damage through power outages
- Eliminates the chance of damage through Overheating or humidity
- Minimise the risk of thief or criminal damage

Connexus Colocation is the industry leading **Colocation** solution to place you ahead of the competition in this rapidly expanding market.

**Connexus Colocation is the industry leading solution to choose, delivering:**

Connexus Colocation allows for the flexibility of customizing your solution and can be combined with IPC's flagship multi-cloud platform Connexus Cloud, allowing for greater access to the IPC ecosystem, connecting to more than 7,000 diverse capital market participants across 750 cities in over 60 countries, all bolstered by market-leading follow-the-sun customer support.

### About IPC

IPC is a technology and service leader that powers financial markets globally. We help clients anticipate change and solve problems, setting the standard with industry expertise, exceptional service and comprehensive technology. With customers first and always, we collaborate with each to understand their individual needs to help make them secure, productive and compliant within our connected community.

Through service excellence, long-developed expertise and a focus on innovation and community, we provide agile and efficient ways for our customers to accelerate their ability to adapt to the ever-changing requirements for advanced data networks, compliance and collaboration with all counterparties across the financial markets.
